To: U.S.Congress

Each and every day, distracted and inattentive drivers pull out in front of, follow too close to or simply "mow over" motorcycles. Bikers are being injured and killed because of carelessness. Most of the time, the drivers receive a warning, simple citation, slap on the wrist or less. If you pull a gun out and accidentally shoot someone, you most likely get tried for Involuntary Manslaughter. If you hit someone on a bike and kill him or her, you get a ticket. Some states have tried to take action but it's time the federal government gets involved. This petition is intended to convince the lawmakers to strengthen penalties for violating current laws, not for creating new laws. Most bikers ride in fear, knowing that if they get run over, the penalty is great for them, but not the careless driver that did them in! If you support the right to live and ride, without the fear of an innatentive driver running you over and getting away with it, please sign this petition.

Sincerely,
